

community

aspirational places

Creating spaces that provide inspiration for all sectors of the community to meet, learn, play, socialise and work has defined bptw partnership's service in community architecture.

bptw partnership has a comprehensive portfolio of successful community and neighbourhood resource centre projects. The practice provides integrated consultation on the delivery of mixed use or specific amenity centres to create robust and aspirational places that define the identity of neighbourhoods and urban centres' throughout the UK.

services

Incorporating award winning innovation in design, construction, planning and sustainability bptw's services include:

community solutions

sustainable design

bptw is committed to sustainable practices both as a business and in every aspect of design focussing on delivering safe, accessible, economically and energy-efficient spaces that benefit the community and the environment.

consultation

Through consultation with the community, clients and stakeholders, bptw informs its designs ensuring the needs of the surrounding area are addressed, whilst creating innovative and aspirational neighbourhoods.
