

Bond House paints a brighter future for New Cross Gate

As part of the regeneration of New Cross Gate, bptw has successfully secured planning permission for a large private residential-led development for client D&DW Ovenell.

Commercial spaces are designated for artist studios and gallery space, continuing the emergence of New Cross Gate, influenced by Goldsmiths College, as a renowned area for art and culture. 78 high quality apartments, a café and landscaped courtyards displaying public art complete the iconic scheme.

Regenerating Greenwich riverside

The regeneration of Greenwich riverside is in full swing with the emergence of a number of high profile schemes along the banks of the River Thames. bptw has had a part to play in this process with the completion of phase one of the dynamic Lovells Wharf development.

Offering top spec penthouses and apartments, bptw's scheme for London and Regional Properties, has delivered desirable new homes configured for modern living with luxury kitchens and bathrooms. Large balconies and terraces provide stunning views over the River Thames.

Rapid progress on site for Wardalls Grove

bptw's exciting Wardalls Grove project is rapidly making progress on site. The striking scheme, for Hyde Housing Association, will transform a former hospital site into a vibrant 124 unit residential development.

Exciting new stylish apartments are being created in addition to two terraces of larger family homes with private gardens, all set around attractive landscaped amenity spaces.
